About the company

Es Komerc d.o.o. was founded in 1992. Until 2000, it operated exclusively as a wholesale company. After 2000, it began developing a retail chain.

Since 2012, the company has been investing in a new manufacturing plants.

We now own 25 retail facilities, a conventional and organic pasta production plant (manufacturing type of production), a frozen pizza and homemade pies production plant, a conventional and organic jams and juices production plant and 1300 t cold storage for deep-frozen fruit.

Volim - Egg Pasta

ITALIAN TECHNOLOGY & OUR SKILLS

VoLim egg pasta is made from wheat semolina and eggs, with the necessary addition of water. It does not contain flavor enhancers, additives.

The pasta dries slowly in order to relax and digest it more easily. Also, slow drying significantly shortens the cooking time (3-5 minutes).

Slow dried pasta → reduced cooking time, easier digestion.

Bronze-cut → rougher pasta structure → sauce stays on top of the pasta, not at the bottom of the pan
